March 6, 2001

Commissioner:

In response to a telephone conference with the Examiner on Monday, March 5, 2001.
Applicant respectfully submits the following:

IN THE CLAIMS:

Please amend claim 20 as follows.

20. (Twice Amended) A fully automated telescope system with functional intelligence distributed between independent components, the telescope system of the type including a telescope mounted for rotation about two substantially orthogonal axes, the automated telescope system comprising:

[an] two intelligent motor portions, each coupled to a respective one of the two substantially orthogonal axes, [the] each motor portion including first processor means for commanding a motor to rotate the telescope a desired arcuate amount about a respective axis,
